

# Education Solutions

Providing a single source for all your education needs

A high quality and equitable education system provides the opportunity for students to gain the skills, knowledge, and mindsets to achieve success throughout their lives. MGT Education’s goal is to support human potential and learning journeys from cradle to career across the entire education ecosystem - because early investments lead to long-term outcomes.

Our Education Solutions originate from our commitment to ensuring that every student has access to a high-quality education as they discover and realize their profound potential. From pre-K-12 to higher education, we partner with schools, districts, state agencies and colleges and universities to deliver performance improvement, transformational planning,

and innovative implementation. We measure, map, and manage enrollment and facilities improvement so clients can meet the instructional, operational, and fiscal demands of a rapidly changing education landscape.

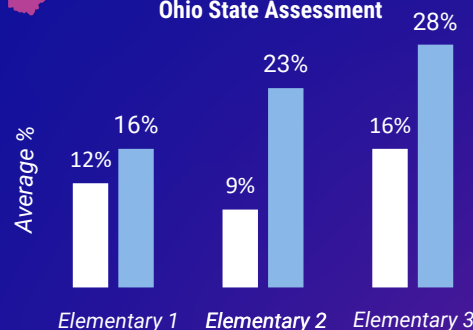

We support the foundational operations, technology, performance, and data educational institutions use, and layer additional execution capacity into that foundation. We view the “last mile” in our solutions offerings as most important in providing not merely the up-front roadmap, but remaining as partners in executing and delivering to achieve the desired outcomes. There is no “one size fits all” for learners of all ages and the necessity of our support and the infrastructure we help build is adaptive at its core.

MGT’s team of experienced educators, leaders, researchers, and coaches collaborate with a shared mission to improve student outcomes. Leveraging a wealth of experience, MGT adeptly manages intricate educational projects, ensuring a smooth journey from conceptualization to realization. Further instances of our impactful contributions are illustrated below.

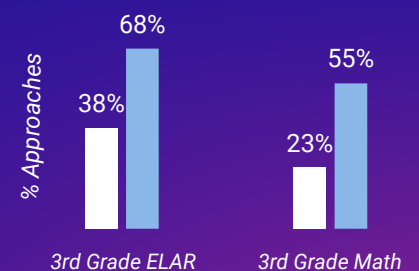

**Average Increase in Proficiency: ELAR + Math**  
Utah State Assessment

**Average Percent Proficient or Above: ELAR**
